

## Try biometrics and CitiManager application!

**150** years  
of progress

We would like to inform you that **online transaction authentication with use of the Corporate Cards Cardholder's biometric data and the mobile application CitiManager** has been implemented.

Biometric authentication and the CitiManager application will be the ultimate method for authentication of online transactions.

### Things to remember:

- A Cardholder of our Corporate Card should have **access to the full (desktop) version of the CitiManager platform** - if one is not yet registered in CitiManager - [can do this here >>](#)
- The Cardholder should have a **phone with enabled feature of scanning biometric data, installed mobile application CitiManager with enabled biometric authentication and push notifications and access to the Internet.**

### It is simple:

#### STEP 1

First, the Cardholder has to be registered in the **full version of CitiManager**

#### STEP 2

Then, the Cardholder downloads the **mobile application CitiManager** from **Google Play** or **Apple Store**

#### STEP 3

The Cardholder logs in to the **mobile version of CitiManager (CMM)** using the log-on data for the **CitiManager (full version)**

#### STEP 4

The Cardholder activates **biometric authentication and push notifications** on their device and in the mobile application **CitiManager (CMM)**

#### STEP 5

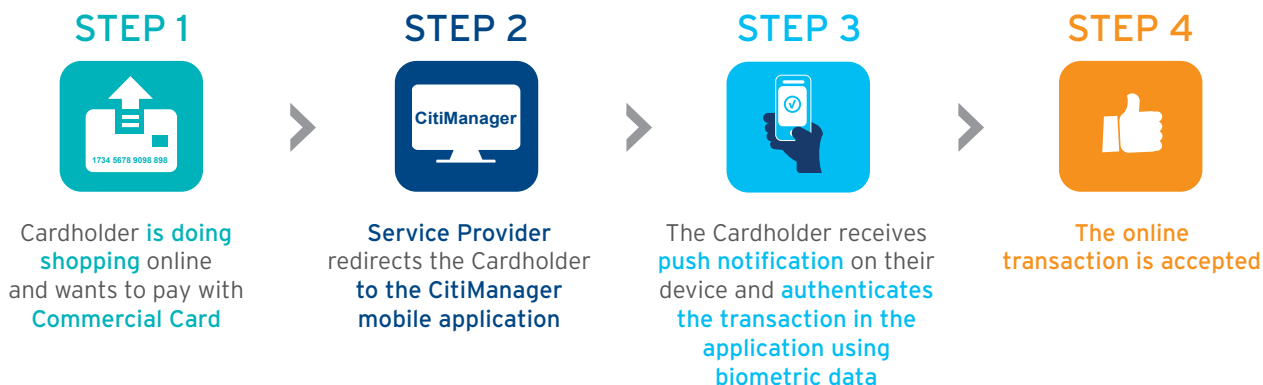

**Biometric authentication** is ready to use!

Biometric authentication of transactions is a very simple and convenient solution for Cardholders. The Cardholder doesn't need to wait for additional messages from the Bank or enter single-use codes - just uses the biometric identification option on the phone - depending on the model of the device, this may be fingerprint ID or face recognition.

### Biometric authentication of transaction step by step:

---

We encourage Cardholders to try out biometrics and CitiManager application as an authentication method of online transactions at the nearest convenience.
